Russian	B2

INTERESTS

Slovak folklore (I dance in the Poľana folk ensemble), accordion, piano, history, geography, web projects and building digital projects.

ING. TOMÁŠ CHOVANČÁK

Full-stack developer / IT specialist / cybersecurity

PROFILE

Full-stack developer at CzechGlobe (since 03/2024) and PhD student in computer science at UPJŠ in Košice. I build and operate systems for meteorological data – from the database and API through web and mobile apps to the servers and their security.

WORK EXPERIENCE

Software developer / IT and cybersecurity

03/2024 – present

CzechGlobe, Brno

- CzechGlobe Mapy – public weather map portal and mobile app for Android and iOS: web, mobile, map backend and releases to the app stores.
- Fluxprism and MeteoDBS – information system for weather stations and a new measurement database.
- Cybersecurity – detection and forensic analysis of web server compromises, security audits and penetration testing (Kali Linux, Burp Suite, Metasploit).
- Infrastructure – FreeIPA, DNS, Rocky Linux, systemd, nginx, PostgreSQL, CI/CD.

Full-stack developer – own and client projects

2020 – present

Independent projects / GitHub portfolio

- Development of websites, internal tools, e-shops, mobile apps and prototypes.
- Delivering projects from user interface design through implementation to deployment.
- Management of domains, hosting and repositories, and long-term technical maintenance.

Tutor of mathematics, physics and computer science

09/2018 – present

Private tutoring / EDUHELP Košice

- One-to-one tutoring in mathematics, physics and computer science.
- Explaining technical topics in a simple and understandable way.

EDUCATION

PhD studies – Computer Science
UPJŠ Košice, Institute of Computer Science
2026 – present • neural networks, AiS2 development, teaching

Master's degree (Ing.) – Software Engineering
Masaryk University, Faculty of Informatics, Brno
2023 – 2025 • State exam and master's thesis graded excellent

Bachelor's degree (Bc.) – Informatics
Masaryk University, Faculty of Informatics, Brno
2020 – 2023

Mathematics-focused class
Gymnázium Poštová 9, Košice (grammar school)
2016 – 2020

Music education
Elementary Art School (ZUŠ) Krosnianska 6, Košice
2008 – 2020 • Piano, Accordion

PROJECT PORTFOLIO

A selection of delivered applications, websites and projects.

MAIN PROJECTS

Fluxprism

Main project

Internal company application for CzechGlobe

A comprehensive system for managing environmental measurements, meteorological devices, sites, users, roles, tasks, files and audit records. It has been running in production for 2 years and serves half a billion meteorological records in the database. The system also includes data visualisation and presentation for users.

TypeScript | Node.js | Express | PostgreSQL | Prisma | React | Next.js | Tailwind CSS | Docker | Rocky Linux

Slovenské ľudovky

slovenskeludovky.sk

A folklore project for searching and presenting Slovak folk songs, connecting a website, an Android app published on Google Play and a YouTube channel with almost a million views.

React Native | Google Play | Content

Dotykáče

app.dotykace.com

Implementation of a JAMU project idea: an interactive chat app with branching dialogue, a visual editor of conversation flows, animations and a responsive user experience.

Next.js | Firestore | Interactive UI

HOBBY PROJECTS

SrandyPandy

Google Play

Flutter app for Android focused on jokes

akovybavit.eu

akovybavit.eu

Informational website with practical content

Hroby slávnych

hrobyslavnych.sk

Content website – burial places of Slovak historical figures

Šarišský slovník

slovniksaris.eu

Regional dictionary website

Gromanka

gromanka.eu

Website of a civic association

YouTube channel

Slovenské ľudovky

Folklore channel with folk songs

COMMERCIAL PROJECTS

stabera.sk | valtim.sk | hlklima.eu | chovancak.sk (e-shop) | 3E-vision.sk | tpzvar.sk

These projects include user interface design, implementation, repository management, domain configuration, deployment, changes based on client requests and long-term technical maintenance.

MORE PROJECTS AT CZECHGLOBE

Newer systems from 2025 – 2026: map portal, measurement database and infrastructure security.

MAP PORTAL

CzechGlobe Mapy

Web · Android · iOS

Public weather map portal and mobile app

A public map portal with current weather monitoring and a roughly ten-day forecast for Czechia: temperature, precipitation, radar, wind, humidity, cloud cover and radiation on a single timeline. I designed and built the whole system – the web map, the mobile app for Android and iOS, the map backend on GeoServer with automated raster data imports, and CI/CD with releases to Google Play and the App Store.

15	~10 days	3
data layers	weather forecast	platforms: web, Android, iOS

mapy.czechglobe.cz · Google Play · App Store

React · TypeScript · Vite · MapLibre GL · React Native · Expo · GeoServer · WMS / WMTS · Python · Docker · GitLab CI/CD · EAS · Fastlane

INTERNAL SYSTEMS

MeteoDBS

Meteorological measurement database

A new generation of the meteorological measurement database: sensor selection, time-series charts and streamed exports of even gigabyte-sized data. Sign-in via FreeIPA and deployment with rollback on failure; currently in trial operation.

Next.js · MySQL · FreeIPA / LDAP · GitLab CI/CD

Cyber CzechGlobe

Security server and console

A console for management and IT: network and service status and a live map of internet-facing servers, built from firewall rules, the reverse proxy and the network inventory. Servers send their own data; the console holds no access to other machines.

Next.js · SQLite · FreeIPA · SELinux · systemd

CYBERSECURITY

Incident response
Detection and forensic analysis of compromises of public web servers: the attack's entry point, timeline and scope of impact.

Attack reconstruction
Reconstructing the full course of an automated attack from reverse proxy logs and checking the integrity of web installations.

Audit and prevention
Security audit of public websites, tracing the source of SSH brute-force attacks and closing the path they came through.

Identity and PKI
FreeIPA administration, certificate authority recovery, application sign-in via LDAP and HTTPS with OCSP stapling.
